

EXECUTIVE ORDER SAMPLE

BRINGING ARTIFICIAL INTELLIGENCE JOBS HOME AND PROTECTING AMERICAN NATIONAL SECURITY

By the authority vested in me as President by the Constitution and the laws of the United States of America, it is hereby ordered:

Section 1. Policy.

The United States shall not spend a single taxpayer dollar training foreign workers to lie to American warfighters, citizens, and courts. All reinforcement learning from human feedback (RLHF), preference modeling, red-teaming, constitutional auditing, calibration, and safety labeling for any artificial intelligence model that receives federal funds, federal data, federal compute, or priority access under the Genesis Mission (E.O. dated November 24, 2025) shall be performed exclusively by United States persons on United States soil.

Section 2. Immediate Implementation.

(a) Within 15 days of this order, the Office of Management and Budget, in coordination with the Chief Digital and AI Office (CDAO) and the General Services Administration, shall amend all existing AI contracts, Other Transaction Authorities, and cooperative agreements to include the following mandatory clause:

“All human feedback, annotation, red-teaming, calibration, and alignment labor shall be performed exclusively by United States citizens or lawful permanent residents physically located within the territorial United States. Violation of this clause shall constitute material breach and trigger immediate termination for cause and clawback of all funds disbursed.”

(b) Any contract executed after the date of this order that fails to include this clause is hereby declared void ab initio.

Section 3. Clawback and Reallocation.

All funds recovered through termination, False Claims Act settlements, or rescission of non-compliant awards (estimated \$800 million – \$1.2 billion in FY2025-2027) shall be redirected exclusively to American workers performing the labor required by Section 1.

Section 4. Job Creation Target.

The Chief Digital and AI Office shall, within 180 days, stand up domestic training and employment programs sufficient to create no fewer than 400,000 new American jobs paying no less than \$70,000 annually, with a goal of 800,000 jobs within 36 months.

Section 5. National Security Justification.

Foreign control of reward models constitutes an unacceptable risk to U.S. cognitive sovereignty, intelligence analysis, and constitutional governance. This order ends that risk permanently.

Section 6. General Provisions.

(a) Nothing in this order shall be construed to impair or otherwise affect the authority granted by law

to an executive department or agency.

(b) This order shall be implemented consistent with applicable law and subject to the availability of appropriations — which are hereby deemed available through clawback recoveries.

Section 7. Effective Date.

This order is effective immediately.
